## Damage from Static Electricity is a Very Real Threat .

Electrostatic discharge (ESD) and electrostatic attraction (ESA) can cripple manufacturing; causing yield and throughput losses, tool downtime and safety hazards. Static electricity damages sensitive electronic devices, increases foreign matter contamination on product, and triggers equipment latch-ups in process tools! Controlling static saves money by eliminating these problems from your manufacturing environment.

## ***Transforming Technologies Provides the Protection You Need!***

### Transforming Technologies offers:

- Outstanding **Static Eliminating Products**

- **Personal Grounding**
- **Floor and Workstation Matting**
- **Testing and Monitoring Equipment**
- **Surface Mount Devices**
- **Conductive Grid Tape**
- **Ionization**

- All products are offered at **Exceptional Value**
- Wonderfully **Capable and Friendly Staff**

We are 100% focused on your satisfaction. Our goal is to make your total static control buying process a more effective, efficient and satisfying experience.

**We call it Static Care®.**
