

# HG1360NM

## Non-marking, Cup Heel Grounder

### Description

Non-marking heel grounders help keep your controlled environment clean. The HG1360NM is constructed from a non-marking and highly dissipative rubber. Features a hi-visibility yellow/green hook & loop closure with an elastic insert to maximize fit and comfort.

These heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. A buried 1 meg ohm resistor is standard. Heel grounders are worn on both feet to provide consistent grounding while in motion.

Meets or exceeds requirements of ANSI ESD-S20.20.

**Key Features:** • Non-marking Rubber • Buried resistor • 1.25" cup design

### Product Specifications

Resistor: 1 meg ohm (+/- 5% tolerance), buried  
Color: Yellow/Green hook and loop, Elastic, grey non-marking rubber  
Rubber Exterior: <10e7 ohms, 1.25" wide, cup  
Ribbon: Conductive yarn in gray polyester ribbon

### Product Number

<u>Item Number</u>	<u>Description</u>
HG1360NM	Heel Grounder, non-marking, 1 meg

*Note: Heel grounders are dependent on foot perspiration in the shoe to create and maintain electrical contact with the body. The HG1360NM works reliably with stockings and socks due to the moisture present.*
