

HG1390S

Hi-Visibility, Cup Heel Grounder

Description

Heel grounding devices provide protection for staff on the move. The HG1390S is constructed from durable materials and features a classic hi-visibility yellow/green hook & loop closure with an elastic insert to maximize fit and comfort.

These heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. A buried 1 meg ohm resistor is standard. Heel grounders are worn on both feet to provide consistent grounding while in motion.

Meets or exceeds requirements of ANSI ESD-S20.20.

Key Features: • Elastic Hook and Loop closure • Buried resistor • 1.25" cup design

Product Specifications

Resistor: 1 meg ohm (+/- 5% tolerance), buried
Color: Yellow/Green hook and loop, Elastic
Black/White rubber
Rubber Exterior: <10e5 ohms, 1.25" wide, cup
Ribbon: Conductive yarn in gray polyester ribbon

Product Number

<u>Item Number</u>	<u>Description</u>
HG1390S	Heel Grounder, Elastic Hook and loop, 1 meg

Note: Heel grounders are dependent on foot perspiration in the shoe to create and maintain electrical contact with the body. The HG1390S works reliably with stockings and socks due to the moisture present.
